

Using Camunda with Distributed Systems

How to use Camunda as a decoupled orchestration component.

Who am I?

From zero to worker orchestration in 5 steps

- Create a new process
- Assign topics to tasks
- Create a topic worker In JavaScript
- Create a topic worker in Java
- Connect the workers to Camunda

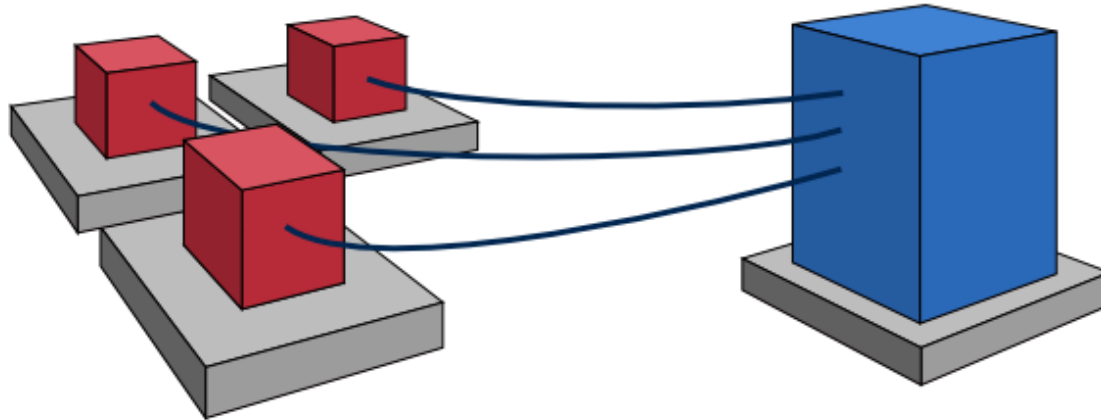

What you will need

- Camunda Distro Up and Running
 - <https://camunda.com/download/>
- Camunda Desktop Modeler
 - <https://camunda.com/download/modeler/>
- IDE of your choice
 - <https://www.eclipse.org/downloads/>
- NodeJS installed
 - <https://nodejs.org/en/download/>
